**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 29 January 2007.  
 2a) This action is **FINAL**.      2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 2, 8, and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is noted that applicant has amended instant claim 1 to contain a portion of claim 2, however, claim 2 has been left to depend from claim 1 and to also recite the portion of claim 2 that has been added to independent claim 1. At the very least, this creates a confusing claim, with respect to the double inclusion of the phraseology in claim 2, which depends from claim 1.

Claim 14 depends from non-existent claim 16.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 4, 6, and 10-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Johnson (Fig. 4; col. 4, lines 9-19).
5. Claims 1-3, 6-9, and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jane et al '615 (Fig. 4) or Jane et al '967 (Fig. 8).
6. Claims 1, 4, 6, and 10-14 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Pankhurst et al (Figs. 14 and 30).

***Response to Arguments***

7. Applicant's arguments with respect to claims 2, 8, and 12-14 have been considered but are moot in view of the new grounds of rejection, which were necessitated by applicant's amendments to the claims.
8. Applicant's arguments filed January 29, 2007 have been fully considered but they are not persuasive.

With respect to the instant claims, the reason certain references were or were not applied to claim 2 had to do with the perpendicular direction of the air flow from the blower relative to the air flow to the blower. The inclusion of a manifold in the device was not relevant to the patentability of any of the claims, since each of the references is considered to teach such. Specifically, each of the references teaches a duct or flow path immediately upstream of the respective outlet grills that allow the treated air to escape to the atmosphere. The duct or flow path is considered to meet the broad recitation of a manifold. Furthermore, the slats of the outlet grills are considered to anticipate the baffle means of at least some of the claims, since they clearly are operative to redirect or baffle the air flow from the device. With respect to the internal

baffle means, as recited by new claims 13 and 14, Johnson (56, as well as the slats in the outlet, both in Fig. 4) and Pankhurst et al (60a in Fig. 30) are considered to anticipate such.

***Conclusion***

9. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
